

Buffing & Polishing Supplies

In a previous article I mentioned the supplies I use in my polishing process. These supplies are readily available online but almost impossible to find in retail stores. They can also be acquired using the information below:

Simichrome polish:

Premium Store (1-866) 537-7083

Catalog #	type	size	cost
44605	Tube	50 grams	\$10.90
44609	Can	250 grams	\$31.90

The tube is about the size of a toothpaste tube and will last a long time. The can is the size of a car polish can, like the old Simoniz wax cans. You don't need to use a lot. It's very soft and goes on very smooth. Just keep rubbing until you get the look you desire, then wipe clean.

Dico Buffing Compounds can be found at Ace Hardware, Sears, and Walmart. They are usually not stocked at the store but can be special ordered and delivered to the store for your pick-up.

Below is the Dico information for Ace Hardware. You can go to the store or place your phone order at: (1-866-290-5334)

Item	Item #	price
Dico 531 TC6	21066 082123531029	\$5.99 Tripoli
Dico 531 WR1	2007003 082123531142	\$4.99 White Rouge

I usually order a bunch but two tubes of each should last you a long time.
