

OTTO BERNZ AALLWWAAYYSSS RREELLIIAABBLLEE

I recently bought a Bernz model 57 torch simply for the steel soldering iron hook. I can always use the SI hooks and it was cheap enough. I evaluated the torch and it wasn't in bad shape. It also had the logo stamped on the front of the tank.

The logo reads "OTTO BERNZ ALWAYS RELIABLE NEWARK NJ USA". When I looked at the logo I thought I was having vision problems. Someone had double stamped the logo and it also appears to be very weak on the bottom. Otto Bernz may have always been reliable but he had at least one employee that wasn't. I don't recall ever seeing anything like this before. If they had a Quality Control Department, this one got passed them.
